

Project Sheet

Project Description

Complete outfitting of 4 drill ships. The project entails the central drilling mast, all handling equipment for drill pipe, risers and BOP's and the riser tensioning system. Huisman is further responsible for integrating all equipment and the supply of the drillers cabins and central control systems. This drilling system represents a completely new generation of offshore drilling systems for working in ultra deep water.

Technical Specifications

- Maximum water depth 3000m, maximum drilling depth 12,000m
- 2 x travelling blocks with 1,000mt capacity, active/passive drill string compensation
- 950mt setback capacity in rotating drums. 41m stand lengths

Delivery

2011
